Jasmine Pfingsten
Web Developer

Film professional turned web developer. Experienced working with teams and iterating through designs to deliver intelligent, elegant solutions. Clear and effective communicator who tackles challenges with enthusiasm, empathy, and precision. Interested in work that takes advantage of my front-end skillset while providing opportunities to learn new languages and technologies, especially in backend or design.

Experience

February 2023 - current
Allianz Partners | Hybrid | Richmond, VA

UI/UX Developer

Dedicated developer on a UX-focused team that creates and optimizes online and in-app offers for travel and event insurance. Supporting multiple major business partners including Ticketmaster, Live Nation, JetBlue, and more.

October 2022 - current
ThriveDX | Remote

Software Development Instructor

Educating college students and adult learners looking to work in tech. Supporting lead instructors in teaching, grading assignments, and explaining concepts. Also take on contract and freelance work during this time as workload allows.

April 2022 - October 2022
Regimen Technologies | Richmond, VA

Web Developer

Assisted in development of quoting and estimation software for SaaS offering "TOPQuote." Delivered on UI change requests, tackled support requests and bug tickets, and proactively involved myself with design and back-end development. Created and maintained product website.

September 2021 - September 2022
Freelance & Bootcamp | Richmond, VA

Web Developer / Bootcamp Attendee

Assisted local businesses with the maintenance or construction of their websites while completing a certificate in front-end development.
